

# Starion MiSeal™ Thermal Ligating System

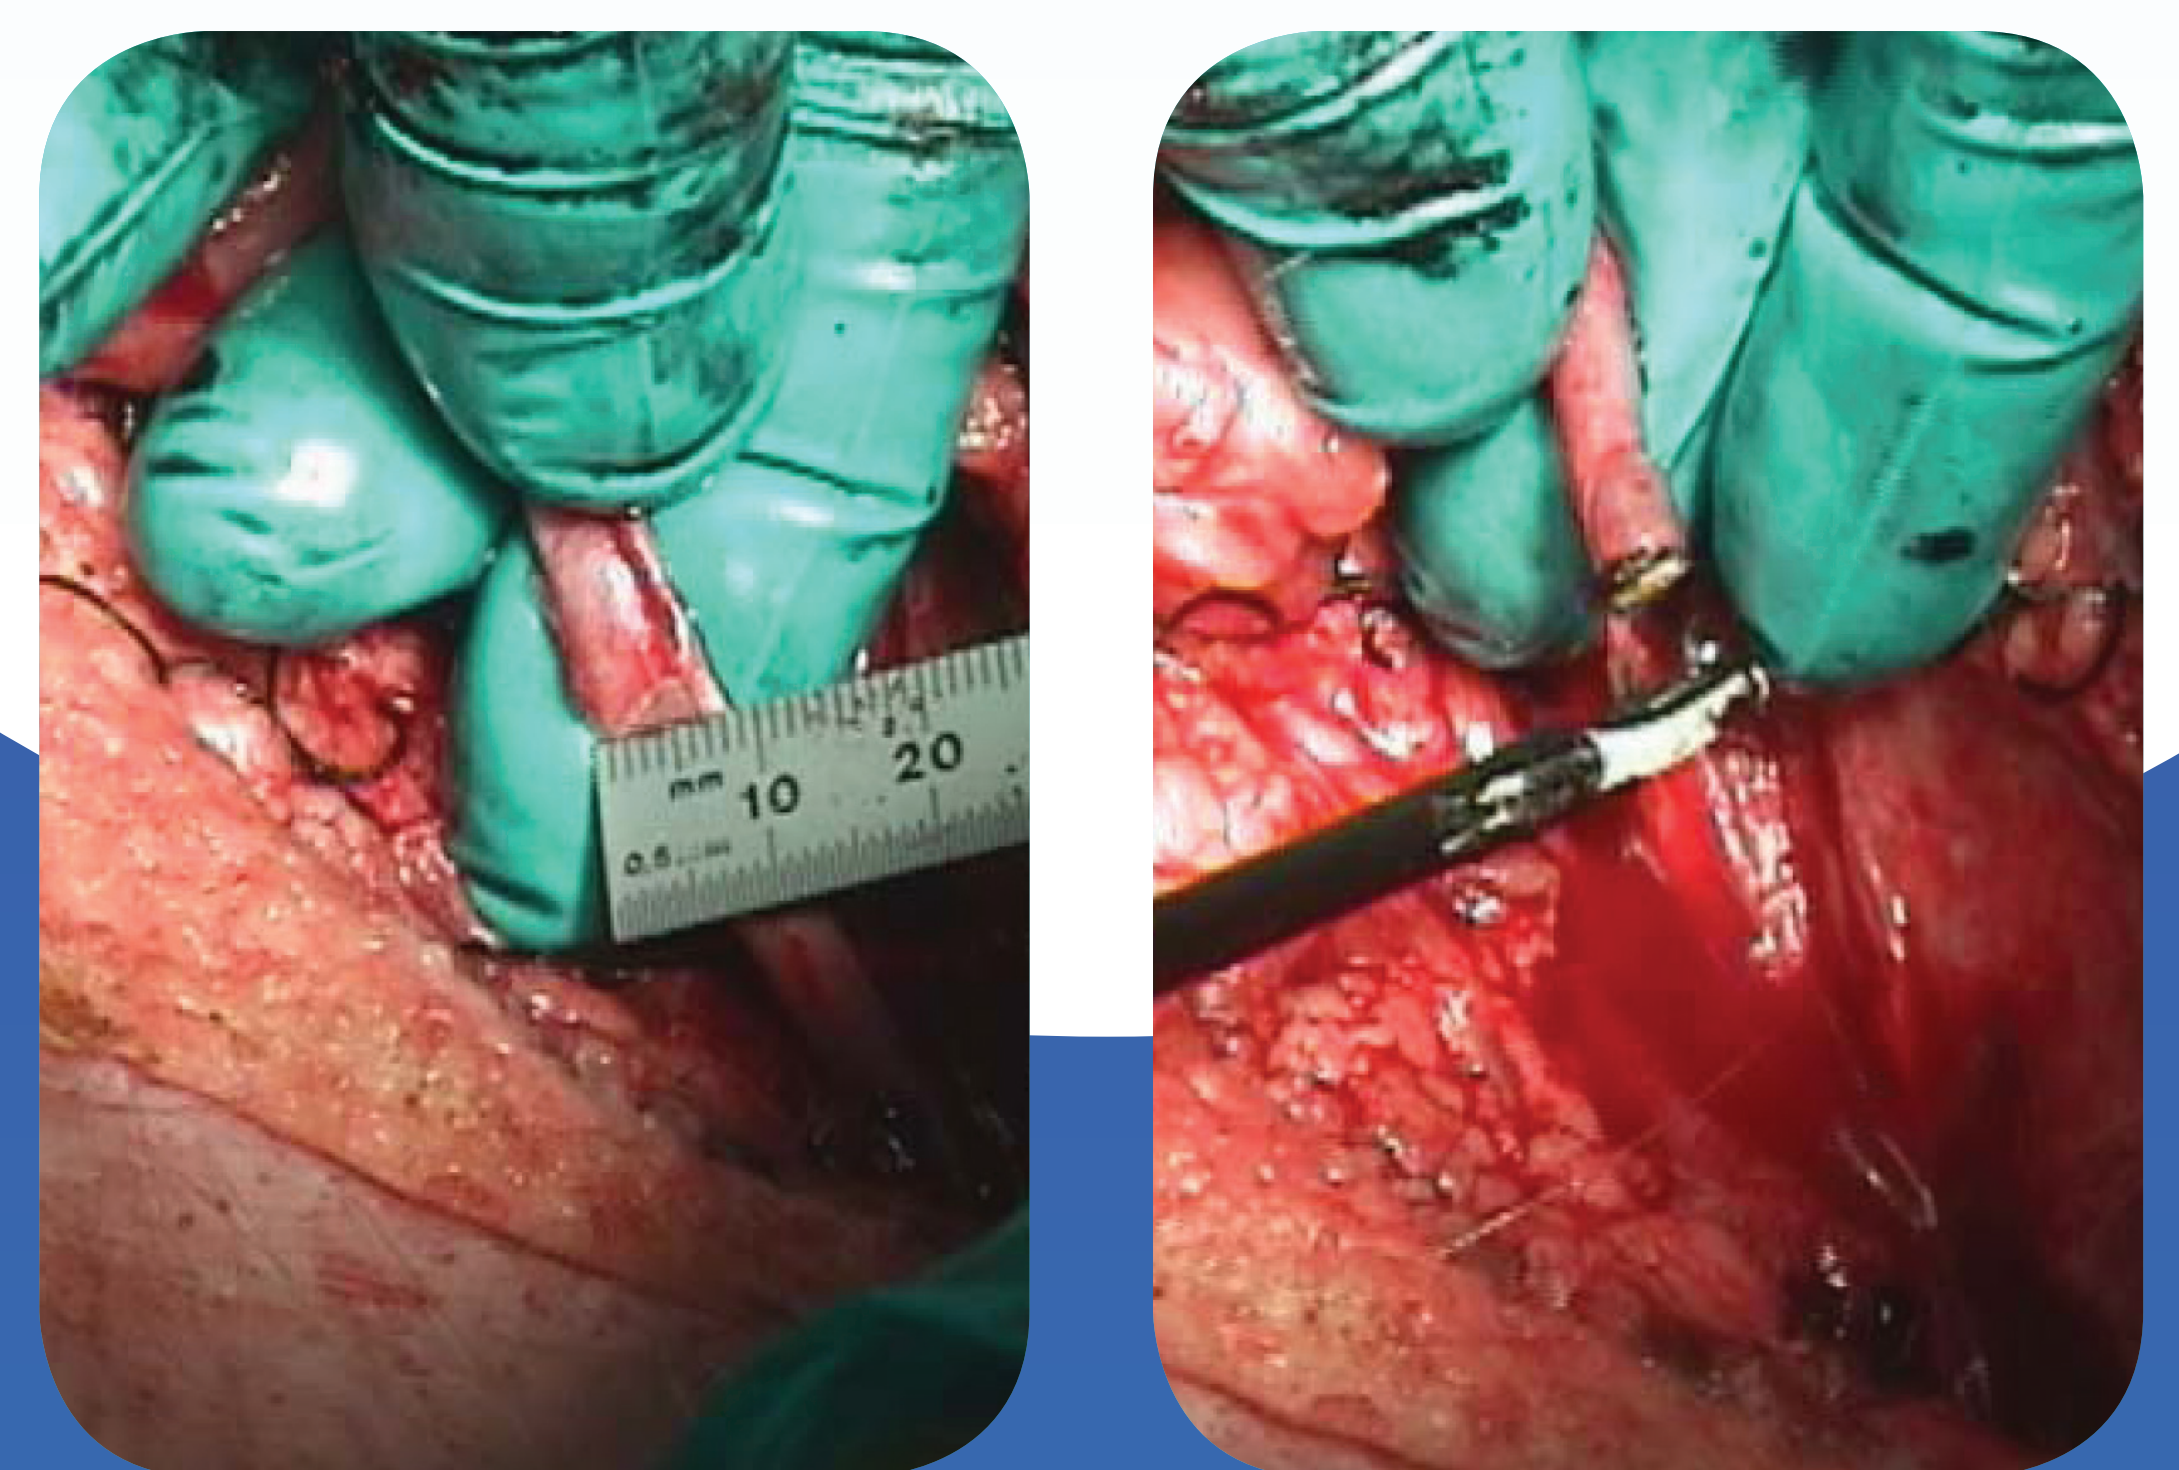

The first and only  
reposable vessel  
sealing technology

**STARION**  
INSTRUMENTS

## Why Starion:

- Simultaneously seals and divides using direct thermal energy – no ultrasonic or bipolar energy
- Minimal lateral thermal spread or smoke generated
- A versatile range of single-use open and Laparoscopic instruments which can be used as a dissector and a grasper, as well as a cutter and sealer
- **New range** of Laparoscopic reposable shears (Reusable handpiece and disposable tips)
- Offers considerable \$\$\$\$ savings vs your current cost on competing vessel sealing units and consumables

A 9mm porcine carotid artery is measured then successfully sealed and divided by the Starion MiSeal™ Instrument TLS

\*USA Society of Laparoendoscopic Surgeons

## Clinical applications:

- General Surgery
- Cardiovascular
- Gynaecology
- Urology
- Colorectal Surgery
- Bariatric Surgery
- Head and neck Surgery
